FIM score from admission to discharge. <i>(The higher the number, the better.)</i> The goal of rehabilitation is to improve the patient's ability to resume control over activities of daily living and function as independently as possible.				NAT'L AVG
• Brain Injury	43.7	43.2	39.6	29.5
• Stroke	40.4	31.2	30.3	25.8
LENGTH OF STAY				
• Average length of stay at the Unity Acute Rehab & Brain Injury Program	22.2 days	22.5 days	20.3 days	16.3 days
AFTER REHAB				
Where patients go after rehabilitation				
• % of patients who go home	75%	75.8%	64.7%	68.9%
• % of patients who go to a skilled nursing home	12%	12.4%	21%	10.8%
• Other/Acute Care Hospital	13%	11.8%	13.9%	12.4%

Unity Acute Rehabilitation & Brain Injury Program (CONTINUED)

PERFORMANCE MEASURE	2008	2009	2010	GOAL
PATIENT SATISFACTION				
<ul style="list-style-type: none"> % of patients who would recommend the Unity Acute Rehab & Brain Injury Program 	98%	97%	98%	100%
<ul style="list-style-type: none"> % of patients who rated the care as excellent at one of our four outpatient rehabilitation sites 	99.2%	98%	99.4%	100%

Unity Aquatic Therapy

Unity Physical Therapy and Rehabilitation offers aquatic therapy at two locations. Aquatic therapy is designed uses the physical properties of water to assist in patient healing and exercise performance. It can help patients who have had an orthopaedic injury, joint replacement, arthritis, back/neck injury, balance disorders, gait deviations, and neurological disorders. For more information about aquatic therapy, call (585) 368-6600.

* Uniform Data System for medical rehabilitation
