## Medication Management System

Unity's medication management system is a safe, convenient, and automated solution that organizes, reminds, and dispenses medications so they are taken properly and on time. For as little as \$1.50 a day, this system allows caregivers the ability to track compliance, avoid dosing errors, ensure equipment functionality, and predict refill requirements.

### *Unity's Medication Management System Provides:*

- » A safe convenient way to manage medications
- » Better self-care and medication administration
- » Reduced risk of hospital admissions associated with dosing errors
- » Greater adherence to treatment regimens

### *Remote Programming*

Our system can be remotely programmed by our product support center for easy, automated system set up.

### *Help/Refills*

The alert system includes a docking base that contains a button which sends a message to a caregiver when the device is not working properly or a tray needs to be refilled.

### *Alerts and Notifications*

Under the medication alert system, a caregiver can log onto a secure web site and monitor how their loved one is doing with taking their medications. They will know if pills are missed or being taken improperly and can follow up before a problem occurs.

Messages can be sent via email, text, or voice to alert caregivers and providers of missed doses, refill requests, and device diagnostics.

## Personal Emergency Response System

Unity's personal emergency response system gives older adults who live on their own and individuals with serious medical conditions the confidence to live and travel independently.

### *Immediate Access Anywhere You Go*

By pressing a lightweight, waterproof button that can be worn around the neck or wrist, subscribers have immediate access to highly trained personnel who immediately connect them with family members, friends or emergency services.

### *Unity's Personal Emergency Response System Provides:*

- » Peace of mind knowing someone is available 24 hours a day, seven days a week
- » Immediate help in an emergency whether you're at home or traveling (GPS satellite system can detect your location)
- » Security at home, at a cost that fits your budget
